Bishal Lamichhane

Software Developer

About Me

Forward-thinking software developer with experience in developing custom software applications and updating existing programs. Committed to building a successful career in software development and seeking opportunities to leverage my skills and knowledge while working as part of a dedicated team. Passionate about learning new technologies and keen on self-growth. I have experience with programming languages such as JavaScript, Python and PHP. I have also worked with databases such as MySQL. I am familiar with software development methodologies and have worked on projects that involves developing web applications, and mobile applications. I am a quick learner and enjoy working in a team environment.

Experience
