Bishal Lamichhane

Software Developer

About Me

Forward-thinking software developer with experience in developing custom software applications and updating existing programs. Committed to building a successful career in software development and seeking opportunities to leverage my skills and knowledge while working as part of a dedicated team. Passionate about learning new technologies and keen on self-growth. I have experience with programming languages such as JavaScript, Python and PHP. I have also worked with databases such as MySQL. I am familiar with software development methodologies and have worked on projects that involves developing web applications, and mobile applications. I am a quick learner and enjoy working in a team environment.

Experience

APR 2023 - PRESENT

Junior Software Developer — Redtailfox Pvt. Ltd

- Worked in implementation of a microservice architecture that improved system modularity and reduced dependencies between components.
- Developed APIs that handled hundreds of users per day with response times under few milliseconds.
- Worked in frontend development for microservice system.

NOV 2022 - MAR 2023

Software Developer Intern — Redtailfox Pvt. Ltd.

- Created and Implemented Ads API for targeted ads.
- Added Score encryption for score submission.
- Deployed application at cPanel.
